Deadline for manuscript submissions:
31 August 2021

Message from the Guest Editor

This Special Issue on the "Design, Concepts, and Applications of Electric Machines" seeks high-quality research work focusing on novel design methodology, new concepts of modeling and simulation methods, and the latest application of electric machines in a variety of industry fields. Topics include but are not limited to:

- Permanent magnet and rare-earth-free motors and generators;
- Induction motors and generators and linear machines;
- Reluctance and special machines;
- Transformers and power apparatuses;
- Motor drives, control, converters, and power electronics;
- Electric propulsion system and power generation system.

Prof. Dr. Giancarlo Cravotto
Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/systems related research in chemistry, biology, materials and allied engineering fields. Our goals are to publish high impact articles of broad interest to the process systems community and to serve as a forum for major developments in process/systems research. The journal publishes regular research papers, communications, letters, short notes, and reviews. There are no restrictions on the length of published articles or on the use of color illustrations. All submitted manuscripts undergo rigorous peer review prior to publication.

Author Benefits

Open Access:—free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: Indexed in the Science Citation Index Expanded (Web of Science) and Inspec (IET). Covered in Scopus from Vol. 5 (2017).
CiteScore (2019 Scopus data): 1.8.
