

THE TWELFTH BIENNIAL IEEE CONFERENCE ON ELECTROMAGNETIC FIELD COMPUTATION

Digest Book

April 30th - May 3rd, 2006

IEEE Catalog Number: 06EX1354

ISBN: 1-4244-0319-7

Jointly Sponsored by
IEEE Magnetics Society, IEEE Miami Section, and
Florida International University

PD6-4	FEM Analysis of a Compressor Induction Motor Drive's Starting Characteristics	305
	<i>Andrej Stermecki, Igor Tičar, Ivan Zagradišnik, and Peter Kitak</i> University of Maribor, Slovenia	
PD6-5	FEM-Based Computation of Flashover Condition for a Special Three-electrode Spark Gap Design	306
	<i>Majjaž Gaber, Mladen Trep, and Jože Pihler</i> University of Maribor, Slovenia	
PD6-6	Finite Element Modeling of Cell Exposed To Harmonic and Transient Electric Fields	307
	<i>J. Meny, N. Burais, F. Burel, and L. Nicolas</i> Université Claude Bernard Lyon, France	
PD6-7	Flaws Identification Using an Approximation Function and Artificial Neural Networks	308
	<i>Tomasz Chady and Przemysław Łopato</i> Szczecin University of Technology, Poland	
PD6-8	Fluids, Particles, and Multiple Robots in Electrostatic Fields	309
	<i>Luciano Pimenta, Miguel Mendes, Renato Mesquita, and Guilherme Pereira</i> Federal University of Minas Gerais, Brazil	
PD6-9	High Frequency Analysis of a Switching Mode Power Supply	310
	<i>Bruno Bolsens, Johan Driesen, and Ronnie Belmans</i> Katholieke Universiteit Leuven, Belgium	
PD6-10	Image Reconstruction of Defects in Metallic Plates Using a Multi-Frequency Detector System and a Discrete Geometric Approach	311
	<i>Ermanno Cardelli^{1,2,3}, Antonio Faba^{2,3}, Ruben Specogna³, and Francesco Trevisan¹</i> ¹ University of Perugia, Italy, ² Polo Scientifico Didattico di Termi, Italy, ³ University of Udine, Italy	

POSTER SESSION PD7
Devices and Applications VIII
May 2, 2006, Tuesday
13:30 - 15:10

PD7-1	Improved Characteristic Analysis Procedure of Hybrid Stepping Motor Considering Overhang Effect	312
	<i>Ji-Young Lee¹, Sang-Ho Lee², and Jung-Pyo Hong²</i> ¹ Korea Electrotechnology Research Institute, Korea, ² Changwon National University, Korea	
PD7-2	Improved Efficiency for an In-Wheel Motor in Large Speed Operating	313
	<i>Daniel Fodorean¹, Abdesslem Djerdj¹, Ioan-Adrian Viorel², and Abdellatif Miraoui¹</i> ¹ Technological University of Belfort-Montbéliard, France, ² Technical University of Cluj-Napoca, Romania
